# Chapter 1

## MRO

### Overview

The Maintenance, Repair, Overhaul (MRO) is the overhaul, repair, inspection or modification of an aircraft or aircraft component.

## Chapter 2

### 2.1.0.2 ogit/Organization

An identity that represents an organization, company, or some other grouping of Person objects. Entities of this type should be created with a predefined ID. Those IDs should be named like a domain name, i.e. a concatenation of some strings separated with a dot. If organization data is created from a LDAP then a mapping like "cn=John Doe,dc=example,dc=com" => "john\_doe.example.com" should be employed. The ogit/function attribute should be used to tell what kind of grouping an entity of type Organization is: company, department, group, ...
